Approving the Month's Commissions & Allowances

Who is this for: General Manager (department GM), and the company's General Manager for the last two sections **How long it takes:** 10-15 minutes a month

What this does

Each month your supervisors record what their teams earned on top of salary — overtime, driver trips, meals, allowances, bonuses — and hand their department over to you. You review it, then approve or send it back. Your approval is what turns the figures into money: it settles the employees' parked loan installments and locks the month for payment.

Sales & Collection is not part of this. It is calculated on its own page and paid separately; it never reaches your approval here.

Before you start

- You approve **only the departments you are set as General Manager of**. A department whose GM is somebody else stays with them, however senior you are.
- A department reaches you only when its supervisor presses **Submit My Entries**. A batch marked *Submitted* is not yet handed over.

Steps

1. **Open Commissions → Monthly Pay Run** and pick the month. The **By Department** tab is one row per department: the supervisor's name, how many records, how many employees, the total, the status and when it arrived.

You are also told, in a blue banner, which departments have **not** handed over yet.

2. Review before you approve.

- **Who Gets Paid** lists every employee due to be paid: earnings, the loan recovery about to be taken, and the net.
- Open any department row → **Employees** to see the entries behind its total.
- On any entry, the **calculator** icon shows exactly how the amount was reached — the salary, divisor and overtime factor, or every trip tier with its rate.

3. **Approve.** Either **Approve** on a single department's submission, or **Approve My Departments** on the pay run to clear all of yours at once.

The screenshot shows the Odoo interface for the KSW Monthly Pay Run submission. The main area displays the submission details for August 2026, including the total amount of 356.25 SAR. The submission is in the 'Submitted to GM' state. The left sidebar shows the submission history, and the right sidebar shows the navigation menu.

4. **Or send it back.** On the department's submission, type the **Return Reason**, then click **Return for Correction**. The reason is required — the supervisor needs to know what to fix.

The screenshot shows the Odoo interface for the KSW Monthly Pay Run submission. The main area displays the submission details for August 2026, including the total amount of 356.25 SAR. The submission is in the 'Submitted for approval' state. The left sidebar shows the submission history, and the right sidebar shows the navigation menu. The 'Return Reason' field is visible, and the submission is in the 'Submitted for approval' state.

What happens next

- **Returned:** the department goes back to the supervisor, the reason is written onto every batch in it, and he is notified in his inbox.
- **Approved, with other departments still waiting:** your departments are locked and the month stays open for the others.
- **Approved, and nothing is left waiting:** the month finalises itself. The **Payment Register** is built from the approved departments only, the parked loan installments are settled out of the commission, and the period **locks** — no supervisor can add or change anything in it. Accounting then exports the bank file.

Closing a month that is still incomplete — the company's General Manager only

If a department never hands over, someone still has to decide the month is finished. That is a company-level call and it belongs to the **company's General Manager**, not to a department GM:

- **Lock the Month Now** — pays only what was approved. A department that never submitted keeps its work in Draft for next month.
- **Reopen** — unlocks an approved month, returns the settled loan installments to pending and turns the register back into a preview. It unwinds **every** department's settlement at once, which is why no single department GM can do it.

If you need either and the button is not there, ask the company's General Manager.

Common issues

Symptom	Cause	Fix
No Approve button on a department	It is not yours — its GM is someone else	The message names who it is waiting on
"None of the departments waiting ... are yours to approve"	Same as above, from the pay-run button	Approve from your own departments, or ask the named GM
"No General Manager is set for ..."	The department has no GM and the company has no default	Ask HR to set the department's General Manager
Return for Correction refuses	The Return Reason is empty	Type the reason in the field above the button first
A department is missing from the month	It has not handed over	The blue banner lists them; chase the supervisor
The register looks wrong after approval	Only approved departments are included	Check the chatter message — it lists what was left out and
