Recording Extra Pay — Pay Entries

Who is this for: Supervisor / Direct Manager **How long it takes:** 10-20 minutes per month, per kind of pay

What this does

Everything your team earns **on top of the basic salary** — overtime, driver trips, meals, allowances, Friday work, bonuses — is recorded in the **Commissions** app as **pay entries**, then handed to the General Manager once a month and paid on its own bank transfer.

This page covers the entry screen itself and how to deal with **each kind of pay**. The two pages after it cover pay that repeats every month (**Recurring entries**) and the month as a whole (**The monthly cycle**).

Sales & Collection is not part of this. Sales and collection commission is calculated on its own page (**Commissions → Sales & Collection**), is handled by the sales roles, and is paid separately. Nothing on these three pages applies to it.

Before you start

- You must be set as the **manager of your department** (or as an assistant to its manager). If you are not, the app will tell you so and you will see nothing to record — ask HR to set it.
- You are ticked for the **kinds of pay you handle** (Overtime, Driver Commission, Location Allowance). If a component you expect is missing, ask the Commission Admin to tick it for you.
- Know the month you are recording for. A batch always covers **one whole month**.

The three words you need

Word	What it means
Component	A kind of pay — Overtime, Meals, Mobile Phone Allowance. The catalog.
Entry	One row: one employee, one occurrence, one amount.
Batch	One component, one department (or work site), one month. Your screen.

One batch per component per month. Overtime for Maintenance in August is one batch (PB000123); meals for the same department and month is a different one. That is what lets each screen show only the columns that kind of pay needs.

Steps

1. **Open Commissions → Pay Entries → My Batches.** The list is grouped by month. You only ever see batches for departments you run.

The screenshot shows the 'KSW Commissions' (عمولات KSW) interface. At the top, there are navigation tabs: 'تسليمات الأقسام' (Department Deliveries), 'دورة المستحقات الشهرية' (Monthly Due Cycle), and 'إدخالات المستحقات' (Due Entries). The main header includes the company name '.Kawther Sweet Water Cont. Co' and a search bar. Below the header is a table with columns: 'الاسم' (Name), 'المكون' (Component), 'القسم' (Department), 'الفترة' (Period), 'السجلات' (Records), 'الموظفون' (Employees), 'المبلغ الإجمالي الحالة' (Total Amount Status), and 'التسليم' (Delivery). The table contains two rows of data for August 2026 and one row for September 2026. A total of 926.25 SAR is shown at the bottom of the table. On the right side, there is a sidebar with various icons and labels: 'المناقشة' (Discussion), 'التقويم' (Calendar), 'لوحة البيانات' (Data Dashboard), 'Workshop', 'KSW عمولات' (KSW Commissions), 'Loans', 'الدعم الفني' (Technical Support), 'الموظفون' (Employees), 'الرواتب' (Salaries), 'الإجازات' (Vacations), and 'التطبيقات' (Applications).

الاسم	المكون	القسم	الفترة	السجلات	الموظفون	المبلغ الإجمالي الحالة	التسليم
أغسطس 2026 (1)				3	1	356.25 SAR	
سبتمبر 2026 (1)				3	2	570.00 SAR	
926.25 SAR							

2. **Create the batch.** Click **New**, then choose:
 - **Component** — the kind of pay.
 - **Period** — the picker opens on a month grid; click the month.
 - **Department** — if you run only one, it is filled in and locked for you. Driver Trips asks for a **Work Site** instead, because it is paid per site.

4. **Check the amounts.** Click the **calculator** icon on any row to see exactly how the figure was reached — the salary, the divisor, the overtime factor, or every tier band with its quantity and rate.

The screenshot shows a software interface with a sidebar on the left containing icons for 'المناقشة', 'التقويم', 'لوحة البيانات', 'Workshop', 'KSW عمولات', 'Loans', 'الدعم الفني', 'الموظفون', 'الرواتب', 'الإجازات', and 'التطبيقات'. The main area displays a table with columns: 'الموظف' (Employee), 'المكون' (Component), 'التاريخ' (Date), 'المبلغ' (Amount), 'المتوسط' (Average), and 'الفترة' (Period). A modal window titled 'How this amount was worked out' is open, showing a breakdown for 'Emergency generator repair' for 'Train Employee' on '3 أغسطس' (August 3). The breakdown includes: 'Basic salary' (6000.00), 'plain hourly rate = 240 ÷' (25.0000), 'overtime factor 1.50 ×' (37.5000), and '3.00 × ساعات' (112.50). The total is 'SAR 112.50'. A note at the bottom states: 'Computed in one expression so the hourly rate is never rounded before it is multiplied'.

5. **Submit** the batch when you have finished typing it.

How to deal with each kind of component

Component	How the amount is worked out	What you type	What else the row asks for
Overtime	Basic salary ÷ 240 × hours × 1.5 (Saudi Labour Law art. 107)	Hours	Date , Location and Reason — all three are required on every row
Driver Trips	Tiered: the trips above the free allowance fall through the site's rate bands	Weighted Trips (الرد المضاعف)	Actual Trips (for justification only), Free Allowance = the driver's required trips for the days he actually worked. Recorded per work site , and there is an Import button that pulls the month's trips from BAS

Component	How the amount is worked out	What you type	What else the row asks for
Meals	Quantity × the rate of the meal you pick	Meals (the count)	Type — Breakfast, Lunch or Dinner. One Meals batch covers all three; do not look for three separate components
Friday Work Allowance	Days × 100	Days	Date
Fixed allowances — Project Management, Location, Data Entry, Mobile Phone	Nothing is calculated	Amount	Location Allowance also asks where
Holiday bonuses — Foundation Day, National Day, Eid Al-Fitr, Eid Al-Adha	Nothing is calculated	Amount	— one component per holiday, on purpose
Employee Bonus and Other	Nothing is calculated	Amount	Reason is required — this is what the approver reads

Overriding an amount. If a calculated figure has to be something else, type it into **Override Amount**. The row turns amber, the original figure is kept, and the explanation says it was overridden. Unlike simply retyping the amount, an override survives a later change to the quantity.

What happens next

The batch moves **Draft** → **Submitted**. That only means *"I have finished typing this one"* — it is **not** yet with the General Manager, and you can still press **Reopen** to correct it.

Your department only reaches the GM when you hand it over. See **The monthly cycle**.

Common issues

Symptom	Cause	Fix
"You are not set as the manager of any department"	Department Manager is empty on your department	Ask HR to set you as the manager, or as an assistant to it

Symptom	Cause	Fix
An employee is not in the picker	They are not in this batch's department/site and do not report to you	Record them in the right department's batch, or ask HR to fix the reporting line
"already covers this component for this scope and month"	You already have a batch for that component, scope and month	Open the existing one and add your rows there
"Hours must be greater than zero"	A row was left at 0 on a calculated component	Type the quantity, or delete the row
"...is outside the batch period"	A dated row carries a date from another month	Fix the date, or move the row to that month's batch
"Every Meals row has to say which one it is"	The Type column is empty	Pick Breakfast / Lunch / Dinner on the row
"Batch ... has been submitted" when editing	The batch is no longer in Draft	Press Reopen — or, if your department is already handed over, Take Back the submission or ask the GM to return it
The component I need is not in the list	You are not ticked for that kind of pay, or it does not exist yet	Ask the Commission Admin

Recurring Entries — Pay That Repeats Every Month

Who is this for: Supervisor / Direct Manager **How long it takes:** 2 minutes to set one up; it then saves you that every month

What this does

A **recurring entry** is a standing instruction: *"this employee gets this component, at this amount, from this date until that one."* Instead of typing a mobile-phone allowance for the same eleven people twelve times a year, you record it once and pull it into each month's batch with one button.

A recurring entry is an instruction, not a payment. Nothing is paid until you pull it into a batch and submit that batch. That is deliberate — you stay answerable for what you hand over, and you can still adjust the figure in a month where it changed.

Before you start

- You maintain recurring entries **for your own team only** — the employee picker shows the people in the departments you run plus everyone in your reporting line.
- Have the figure and the **start date** ready. The start date is what decides which month it first appears in.

When to create one — and when not to

Create a recurring entry when all three are true:

- it is the **same employee**, month after month;
- it is the **same component** at the **same figure**;
- it needs **no per-occurrence justification** — no date, no reason, no location.

Typical cases: a mobile-phone allowance, a project-management allowance, a data-entry allowance, a standing meal entitlement.

Do not create one for pay that varies. Overtime, driver trips, Friday work and one-off bonuses change every month and carry a date and a reason — they are typed per occurrence in the batch itself. A recurring entry there would only give you a wrong figure to correct twelve times a year.

When to record it: before you build the month's batch. The pull only picks up entries whose **Start Date** is on or before the month you are recording, and whose **End Date** is empty or on or after it. An allowance you add on the 20th, dated the 1st, is picked up for that month; one dated next month is not.

Steps

1. **Open Commissions → Pay Entries → Recurring Entries.** The list is grouped by component.

2. **Add a line** and fill in:

Field	What to put
Employee	Your team member.
Component	The kind of pay.
Type	Only for a component that has choices (Meals) — which one repeats.
Quantity	For a <i>quantity × rate</i> component — e.g. 22 lunches a month.
Amount	For a <i>fixed</i> component — what to pay each month.
Reason	Optional, but it is what a later approver reads. Say why.
Start Date	Defaults to the 1st of this month. The first month it applies to.
End Date	Leave empty to run indefinitely.

3. **Save.** Nothing else happens — the instruction is now on file.
4. **Each month, pull it in.** Open (or create) that month's batch for the same component and click **Add Recurring.**

The missing rows appear. It is safe to press it more than once: an employee who already has a row in the batch is skipped, so nothing is duplicated and nothing you typed by hand is overwritten.

5. **Adjust anything that changed** for this month, then submit the batch as usual.

Ending or changing one

- **To stop it: set the End Date. Do not delete the entry.** The end date stops it cleanly from the next month, and the record of why the allowance was paid stays. Deleting throws that history away.
- **To change the figure permanently:** edit the amount or quantity. It applies to every month you pull from then on; months already submitted are untouched.
- **To change it for one month only:** leave the recurring entry alone and edit the row in that month's batch after pulling it in.
- **Created in error?** Untick **Active** (or delete it if it has never been pulled into a batch).

What happens next

Nothing, until you pull it into a batch. The pulled rows behave like any other entry from that point on: they are submitted with the batch, handed over with the department, approved by the GM and paid on the commission transfer.

Common issues

Symptom	Cause	Fix
Add Recurring added nothing	The dates do not cover this month, the rows are already in the batch, or the employee is outside the batch's scope	Check Start Date / End Date , and check the batch's department or site
An employee is not in the picker	They are not in a department you run and do not report to you	Ask HR to correct the department or the reporting line
"...already has a recurring ... starting on that date"	There is already an entry for that employee, component, type and start date	Edit the existing one instead of adding a second
"A recurring Meals has to say which one it is"	The component has choices and Type is empty	Pick Breakfast / Lunch / Dinner
"The end date cannot be before the start date"	Dates the wrong way round	Fix the dates
The pulled row shows the wrong amount	The component is calculated, not fixed — the amount comes from the quantity	Correct the Quantity , or override the amount on the batch row

The Monthly Cycle — Submitting and Getting Paid

Who is this for: Supervisor / Direct Manager **How long it takes:** 10 minutes at the end of the month

What this does

Explains what happens to your entries after you have typed them: how your department is handed over, who approves it, how the payment is worked out, and what locks when.

The chain, once

your entries

→ Submit the batch ("I have finished typing this one")

→ Submit My Entries (your DEPARTMENT goes to the GM)

→ the GM approves your department

→ the month locks and the Payment Register is built

→ Accounting exports the bank file

The two Submits are not the same thing

This is the single most common confusion in the app.

	Submit on a batch	Submit My Entries / Submit to GM
What it means	I have finished typing this one batch	My whole department is complete — please approve
Who sees it	Nobody yet	The General Manager, in his inbox and by email
Can you undo it?	Yes — Reopen , on your own	Only Take Back (while the GM has not acted), or he Returns it
Effect on your batches	None — still yours	Frozen. You cannot edit them

So a batch sitting in *Submitted* is **not** with the GM. Until you hand the department over, your work is still on your desk.

Steps

1. **Finish and submit every batch** for the month.
2. **Check the money before you hand over.** Open **Commissions → Monthly Pay Run**, pick the month, and open the **Who Gets Paid** tab. You see your own people: what they earned, what their loan installments will take, and the net.

The screenshot shows the 'KSW Monthly Pay Run' interface. The main content area displays a table titled 'PR000002' for the month of August 2026. The table is divided into sections for 'الموافقة' (Approval) and 'الشهر' (Month). Below these, there is a section for 'معالجة' (Processing) with a warning message: 'هذه هي الأرقام كما هي الآن: مستحقات كل قسم سُلم، وتقدير لأقساط القروض التي سَتُسَوَّى منها. واعتماد الشهر هو ما يجعلها نهائية.' (These are the figures as they are now: commissions for each department are submitted, and an estimate for loan installments that will be settled from them. The month's dependency is what makes it final). The table lists employees and their respective amounts:

الموظف	القسم	المستحقات	استرداد القروض	صافي المستحق
Train Employee	...in Department	356.25 SAR	0.00 SAR	356.25 SAR
		356.25 SAR	0.00 SAR	356.25 SAR

At the bottom, there is a note: 'سطر واحد لكل موظف، تُظهر العدسة كل إدخال وراء الرقم. استخدم زر الموظفين أعلاه لفتح السجل نفسه مُحقَّقًا حسب القسم — وهو أيضًا حيث يُصحَّح المحاسب استرداد القروض.' (One line for each employee, the lens shows every input behind the number. Use the employee button above to open the same record — it's also where the accountant corrects loan repayments.)

While the month is open these figures are a **preview** — an estimate of what would be settled. Approval turns them into the real settlement.

3. **Hand the department over.** On the same screen, click **Submit My Entries**. It submits any batch you left in Draft on the way through, and it moves **only your** departments — never anyone else's.

The same button exists as **Submit to GM** on **Commissions → Department Submissions**, if you prefer to work from there.

4. **Wait for the General Manager.** He approves your department, or returns it.

How the payment is worked out

- Extra pay is paid on **its own bank transfer**. It does not go through the payslip.
- For each employee: **Net payable = earnings – loan recovery.**
- The **loan recovery** is the installments parked against commission for that month. They are settled oldest-first out of the commission; if the commission only partly covers an installment, that installment is split and the rest keeps waiting.
- Employees flagged **Settle Deductions from Commission First** have that month's installments parked automatically when the month is approved. Anything the commission does not cover falls straight into that month's payslip instead of waiting for a future commission run.

If it comes back

A returned department carries the GM's **reason**, shown in an amber banner on the department submission **and on every batch in it**. Fix what he asked for, then press **Submit My Entries** again.

Once the month is locked

When the month is approved, the period is closed. Nothing in it can be created, edited, deleted, submitted or reopened — every attempt gives you a message naming the month and telling you to ask the General Manager. **Anything you missed goes into next month's batch.**

What happens next

The Payment Register is built from the approved departments only, the loan installments are settled, and Accounting exports the bank file and marks the month paid. A department that never handed over is simply not paid this month; its work stays in Draft for you to submit next month.

Common issues

Symptom	Cause	Fix
No Submit My Entries button	You have nothing outstanding — either nothing recorded, or already submitted	Check Department Submissions for the month's status
"There is nothing to submit — no entries have been recorded"	Your batches are empty	Fill them in, or delete the empty ones
"These batches have no entries"	An empty batch is blocking the handover	Delete it or fill it in
I need to correct a submitted batch	Your department is already handed over	Take Back the submission if the GM has not acted, otherwise ask him to Return it
"has been approved and is locked"	The month is closed	Record it in next month's batch
The register shows figures I did not expect	It is a preview until approval, and it includes every handed-over department of yours	Open a line's entries to see exactly what made the figure
